# Introduction

---

The purpose of this document is to describe the requirement specification for the web site "Tech Check". The intended audience for this document is the grader of this assignment.

## Purpose

---

The purpose of Tech Check is to be a website where the average person can go to learn about various technologies and get IT support. Our sole goal is to inform the average consumer about current computer science trends while keeping them up to date on how to troubleshoot and solve any issues that occur with their current devices. We pride ourselves on being lovers of knowledge and we appreciate how drastically technology has increased the free and easy flow of information. We are a not-for-profit organization that specializes in computer science. Consisting of a diverse team of programmers and hardware technicians, Tech Check is a leading competitor in the Techosphere.

## Specific Requirements

---

- Include one text box for a users email address.
- Include two additional text boxes.
- Include one list box.
- Include three check boxes.
- Include three radio buttons.
- Include a Submit button.
- Include field sets and legends as needed.
- Data should be validated for not missing, valid format etc as needed with php, appropriate error messages will be displayed.
- Form should email the person who filled it out.
- Form data should be saved to a csv file. Provide a link to this file on your main index.
- Forms always need to provide feedback to the user so they know what happened after filling out the form.
